OLD MCGILL CAME OUT ON LONG END. 4-3 SCORE IN GAME WITH LOYOLA. "TED" BEHAN AND HUGHES WERE STARS

Fast Game at Victoria Rink Results in Another Victory for McGill—Laval Down National, 2-1—Can. Vickers Lose Game by Default—Laval and McGill Again Leaders in City League.

The momentous game between the Senior hockey team and the hockeyists representing Loyola was played off last night at the Victoria Rink, and resulted in a victory for McGill by the narrow margin of the odd goal in seven. The Loyola team put up the strongest kind of argument, and the result was in doubt up to the ringing of the gong. The rough condition of the ice during the first period made combined play difficult, and the brand of hockey displayed by the teams was not of the very highest order.

The play went as follows: Magee gets the puck from the face and rushes, taking a shot. Behan secures and rushes, being checked by Slater, who in turn is stopped by Gallery. The latter rushes and shoots without effect. Gallery secures the puck again, but loses to Magee, who rushes and gives Dooner a shot. Hughes takes the rubber, and is checked by Slater. Timmins rushes and is checked by Hughes; while lying on the ice he slips the puck past Dooner for the first goal. Great applause rises from the Loyola supporters.

At the face, Behan passes to Hughes, who rushes and is checked by Loneragan. Behan secures again and passes to Gallery, but the pass is off-side. Behan rushes from the face, only to be checked by Slater. Loneragan rushes and shoots without being able to score. Gallery relieves and passes to Hughes, who rushes and shoots. Timmins makes a great save. Slater takes the puck back, and is stopped by Anderson, whose rush is terminated by Loneragan. Slater secures and is checked by Behan, who shoots. Gallery takes the rebound, but cannot get past Timmins. Behan again secures, but is checked by Slater. The play is stopped for a moment owing to the fact that there are seven Loyola men on the ice. At the resumption of play, Behan rushes and shoots; Loneragan secures and rushes, but loses to Anderson. He again gets the puck and shoots wide. Hughes rushes and is checked by Loneragan. Slater secures and makes a sensational rush; he shoots without effect. Hughes relieves and makes a counter-rush, but Slater checks him, rushes and shoots. Hughes gets the disc and passes to Cully, who shoots. Loneragan relieves and makes a speedy rush. He shoots, but Dooner brings off a fine save. Behan rushes and shoots. Timmins secures. Magee rushes, passing to Slater, who is checked by Anderson. Behan rushes and shoots. Timmins secures, rushes and takes a shot, but the rubber goes wide. Cully relieves, rushes, and loses to Loneragan, who rushes and passes to Slater. Slater shoots without effect, but immediately after, by a pretty combination with Loneragan, scores. The tally now stands 2-0 for Loyola.

At the face Magee secures and is checked by Gallery. Timmins rushes, but is checked by Anderson. "Andy" takes the puck up the ice, but loses to Slater, who rushes and gives Dooner a shot. Loneragan secures, and is checked by Behan, who skates into the goal, but L. Timmins knocks the disc aside. Magee relieves and rushes, shooting without effect. Anderson rushes and shoots. Hughes gets the rebound and loses to Magee, who is checked by Behan. "Teddy" rushes and shoots. The rubber flashes past Timmins for McGill's first goal. The score is now 2-1 in favour of Loyola.

From the face, Loneragan secures the puck and passes to Magee. Behan intercepts the pass. Magee steals the puck and is checked by Hughes, who passes to Cully. The latter rushes and passes to Gallery, who shoots. N. Timmins relieves, and carries the disc up the ice. Behan checks him, but the Loyola man again secures. Anderson steals the puck and passes to Behan, whose rush is ended by Slater. The puck bounds to Timmins, who is checked by Gallery. The latter rushes and shoots. Loneragan relieves and rushes, being checked by Anderson. Cully secures and takes a shot at Timmins, without scoring. N. Timmins gets the puck and skates up the ice; he shoots, but Gallery secures and passes to Behan, who loses to Slater. The latter is checked by Loneragan. Anderson secures, but once more Loneragan gets the puck and rushes, taking a shot. Hughes relieves, and passes to Gallery, who shoots. The shot is stopped, but Cully takes one, being unable to score. Magee rushes, but is blocked by Behan. Rooney replaces Gallery. Behan rushes, and is checked by Slater, who loses again to Behan. Mowatt steals the puck and shoots. Anderson relieves and rushes, only to be checked by Loneragan. Hughes secures and rushes, but is brought back for kick-

ing with his skate. Behan secures from the face, and passes to Rooney, who passes back to Behan. "Ted" is checked by Loneragan, and Timmins secures, passing back to Loneragan, who is off-side. Loneragan passes from the face to Timmins, who is checked by McGill's. Loneragan makes a rush and almost scores as the gong rings. The score at half-time is 2-1 for Loyola.

With the resumption of play, Loneragan rushes, but passes off-side. He secures again from the face, and passes to Slater, who passes to Mowatt. The latter shoots. Behan relieves and after an exciting dash down the ice scores in one minute, putting the McGill team on an equality with their opponents.

At the face, Behan secures and rushes, giving Timmins a hard one. Again getting the puck, he loses to Loneragan. Magee rushes and is checked by Anderson. Loneragan securing the rubber. Loneragan is checked by Cully, who in turn loses again to Loneragan, who passes to Timmins; the latter makes a rush and shoots. Dooner saving. Anderson takes the puck back, and is checked by Slater, who rushes and shoots. Loneragan secures the puck, makes a rush and scores, putting Loyola once more in the lead, 3-2.

At the face, Behan secures, but is recalled for kicking the disc. Getting it again he passes to Gallery, who rushes without effect. Cully makes a rush, but loses to Timmins, who rushes and shoots. Hughes relieves and passes to Anderson, but the latter is checked by Loneragan. Magee rushes, and Anderson stops him. Loneragan tries a rush, but loses to Gallery, who passes to Behan. "Ted" passes back to Gallery, who misses the pass, Slater securing the puck. Hughes checks him, and passes to Anderson, who is checked by Loneragan. Timmins rushes and shoots. Cully relieves, and loses to Slater, whose rush is checked by Hughes. "Bill" makes an off-side pass to Gallery. From the face, Gallery gets the puck, rushes and passes to Anderson, who loses to Slater. Slater rushes, and is checked by Hughes. Cully secures and rushes, losing to Mowatt, but he gets the puck back again. Magee checks Cully, and loses to Gallery, who rushes and shoots without effect. Slater relieves, rushes, and passes to Magee, whose shot falls to find the net. Cully makes a rush and shoots. Slater's rush is terminated by Hughes. Whitcomb is now on the ice for McGill. Loneragan rushes and shoots, but cannot score. Anderson makes a counter-rush, but loses to Slater. Behan secures and passes to Gallery, who shoots. Behan gets the rebound, but cannot put it past Timmins. Magee rushes, and passes to Slater. Cully checks him, and rushes, passing to Gallery, who shoots. Magee secures and rushes, losing to Cully, who takes the puck up the ice and shoots. Getting the puck on the rebound, he passes to Behan, who passes to Gallery. The latter shoots. Behan again secures

the rebound and scores, once more evening the score. The tally is now three all.

Magee secures from the face, and rushes, shooting wide. Behan gets the puck, but is checked by Magee, who passes to Timmins, who in turn passes to Mowatt, who is off-side. Behan secures from the face, and passes to Gallery. Gallery passes to Hughes, who rushes without effect. Slater returns the rush and is checked by Rothschild. Magee secures the puck and makes an off-side pass to Slater. Magee again secures from the face, and is checked by Gallery, who passes back to Hughes. The latter rushes, and passes to Behan, whose shot falls to register. Gallery secures and rushes, losing to Slater, who is checked by Rothschild. Mowatt steals the rubber and passes to Slater, who shoots. Timmins takes a shot, and Dooner saves. Loneragan gives him another hard one. Rothschild steals the puck from Magee and passes to Cully. Cully passes to Hughes, who passes off-side to Gallery. Mowatt secures from the face, and is checked by Behan, who passes to Anderson, who rushes and passes back to Behan. The latter shoots without effect. Slater gets the disc and shoots, but Behan once more secures and rushes, giving Timmins a wicked shot. Magee relieves, and makes a rush, but Gallery steals the puck from him, dashes down the ice and scores in sensational fashion. The score is now 4-3 for McGill.

From the face, Mowatt rushes and shoots, but Gallery secures and rushes, passing to Behan, who shoots, and in a mix-up in front of the Loyola goal is hurt about the head. He refuses to leave the ice, and play is resumed. Cully gets a pass from Behan and rushes, passing to Gallery, who shoots, and immediately after the gong sounds, giving the victory to the Red and White by a score of 4-3.

In resuming the game, the only statement that can be made concerning the play of the members of the McGill team is that every one, both of the regulars and the substitutes, played his hardest. The outstanding stars were, perhaps, "Ted" Behan, who scored two goals, and Bill Hughes, whose work in the second period contributed largely to the success of the Red and White. Dooner, in goal, put up a fine game, and saved many difficult shots.

The way the goals were scored:

First Period.
1—Loyola...Timmins . . . 2.00 min.
2—Loyola...Slater . . . 7.00 min.
3—McGill...Hughes . . . 2.00 min.

Second Period.
4—McGill...Behan . . . 1.00 min.
5—Loyola...Loneragan . . . 2.00 min.
6—McGill...Behan . . . 9.00 min.
7—McGill...Gallery . . . 5.00 min.
Penalties Mowatt, Rooney, Hughes and Slater, 3 mins.

In a fast, fairly even game, between Laval and National, the former were victorious by a score of 2-1. While Laval had the better of the first period, National looked to be stronger in the second, but were unable to overcome their opponents' lead.

The scoring:

First Period.
1—Laval...Dufresne . . 18.00 min.

Second Period.
2—National...Godel . . . 16.00 min.
3—Laval...Laurendeau . . 1.00 min.
Penalties: Limoges, Brunet, Dandurand, Courchesne, Brisebois, Brunet, Dandurand.

In a speedy, but exceedingly rough, exhibition, the youthful Shamrock team were overwhelmed by the Vickers team by a score of 6-0. Owing, however, to the fact that Vickers played Chamillard, a Montreal League player, to whom they have no right, the game was protested and awarded to Shamrock. Chamillard is suspended indefinitely by action of the E.H.A. Vickers played an extremely rough game throughout, and their play was marred by a style of hockey which is foreign to the City League.

The scoring:

First Period.
1—Vickers...Tannahill . . . 10.00 min.
2—Vickers...Chamillard . . . 4.00 min.
3—Vickers...Chamillard . . . 1.30 min.
4—Vickers...Tannahill . . . 13.00 min.

Second Period.
5—Vickers...Chamillard . . 1.00 min.

MONTREAL, TUESDAY, JANUARY 8, 1918.

LAST NIGHT'S GAME.

Those who witnessed last night's struggle between McGill and Loyola in the Victoria Rink, the new battle ground for the City League "Stars," should feel optimistic regarding the final outcome of the hockey season, so far as McGill is concerned. The Red and White players showed good reason for supposing that they at least equal last year's team, and will carry off the laurels in the City League.

But next Monday night they will meet a rival even more worthy of their best efforts than Loyola, and probabilities point to a repetition of that long-to-be-remembered game which gave a large number of hockey enthusiasts an hour of thrilling sport last winter, and which was followed by a joyous celebration for McGill students in the Union. If McGill showed up well last night, Laval also placed their ability beyond question by defeating National with a final score of two to one, their individual rushes being, as usual, the most noticeable feature of their play. We do not venture to predict the result of next Monday night's event, but whatever the outcome, the game is sure to be very closely contested throughout.

OVER-HEATED CLASS ROOMS.

Cries and appeals are coming from every corner of the land over the shortage of coal, and the dearth of other necessities. Fortunately, here in Illinois we are fairly well provided with sufficient food and fuel. The University is especially well prepared, in comparison with many other institutions, to maintain her regular schedule, unhampered by any fuel shortage.

The mere fact of a sufficiency for the present, however, is no warrant for any waste. America needs every lump of coal in the land. There is no place for any unnecessary use of fuel. Recommendations have been made to lower the temperature of American buildings to 68 degrees instead of maintaining the usual 72 degrees. The suggestion is a sensible one, and should be heeded by every citizen. The University is no exception. How many times have we heard complaints about many buildings on the campus, the library in particular, being overheated! This is a time for conservation of fuel. Let's have no excessively hot class rooms and do an inconspicuous service in helping to win the war.—Daily Illini.

CONCENTRATE YOUR EFFORTS.

The diversity of opportunities offered to every student to become interested in war work now being carried on in the University has a tendency to produce a too extensive effort on the part of the individual student, and consequently to diminish the value of that effort. The right thing to do is to put all your vitality into a single line of endeavour, and make that thing so far as you lies a howling success. It is easy to dabble a little in Y. M. C. A. campaigning, Red Cross work, Liberty Loan selling, etc., but the best results can only be had by the student centering his efforts in a single one and fighting that to a finish. Intensive effort only will produce real results. Too many irons in the fire makes the fire burn more feebly.

We would advise, therefore, that every student settle upon a single phase of war work, and concentrate all his energies upon making that thoroughly successful.

Put all your eggs in one basket, and fewer eggs are likely to be cracked on route.—Daily Maroon.

R. V. C. NOTES.

Last evening a most interesting and amusing event took place in the Common Room of the R.V.C. An auction was held for the benefit of the postman, who is, as the Assistant Auctioneer said, "the best friend of the R.V.C."

It has been the custom to give the postman some token of remembrance and appreciation at each New Year, and an auction has been found to yield the best returns for that purpose. Miss Lichtenstein acted as Chief Auctioneer, and Miss Cameron as Assistant Auctioneer.

After a short but very amusing explanatory address by Miss Cameron, Miss Lichtenstein began the auction. A large collection of valuable articles was for sale, in which pictures and spectacle cases predominated. There were also jewellery, glassware, a pair of snowshoes, and a number of articles, both useful and ornamental.

If one were to judge from the way in which the bidding mounted, the articles were highly coveted by those present, and the result was that the returns from the auction were considerable.

When all the articles were in the possession of the eager buyers, the auction was brought to an end by three hearty cheers for the Auctioneer.

There will be a meeting of the Menorah Society to-day, at 4.45 p.m., in Room 2 of the R.V.C. Miss Salie Solomon will give a report of the Menorah Quinquennial Convention, which was held in New York during the holidays. The subject of discussion will be "Canadian Jewish Problems."

The fifth reunion of the season of the Alliance Française will be held on Wednesday, January 9, at 8.15 p.m., in the Ritz-Carlton Hotel. M. Stephane Lauzanne, redacteur en chef du journal "Le Matin," will deliver an address.

The first of the lectures to be given under the auspices of the R. V. C. Alumnae Society will be given this evening, at 8.15, in the Assembly Hall of the R. V. C., when Prof. Stephen Leacock will deliver an address on "Frenzied Fiction." Tickets will be 25c. The proceeds are to be in aid of our wounded soldiers.

There will be a short meeting of the Societe Francaise at one o'clock on Wednesday, for the purpose of electing a secretary to succeed Miss Sara Steeves.

who are eager to pursue their education after working hours.

"I seem to be neither one thing nor the other," thought the newcomer to herself. "I'm not the much respected college graduate whom the university bestows more honors; neither am I the hard-working man or woman who is sincerely keen about learning what he can even under many difficulties. If I were only a few years younger—and, if I had not my book to finish—the obvious thing would be simply to enter college and go pluckily through the four years of required work. But I'm not quite convinced that, under the circumstances, it would be quite worth my while; I should literally have to give up everything else while I was doing it. It does seem as though there must be some way in which I can get this history course which I really want very much. It can't be that they mean to make the acquiring of an education by non-college graduates such a tremendously difficult thing."

Just then it occurred to the newcomer to go to the woman's department of the university, where she knew that a number of the well-known university professors taught. Yes, upon consulting the catalogue of that college, she discovered that the desired course, by the desired professor, was listed there. Unhesitatingly she then mounted the stairs and entered the room where scores of chattering undergraduates were waiting their turn to consult with the one or two professors in attendance. When her interview came, she found herself baffled again. The professor could not seem to understand why she was there.

"I want to take this course," she repeated, the words assuming to come mechanically now. "No, I am not a college graduate, but I wish to study and I can. I've done considerable serious work ever since I left school. I've published two moderately successful books for children, and am at work upon a third. All I am asking is the privilege of sitting in the class room and listening to the lectures given in this course."

"It is most unusual," remarked the professor, after much reflection. "Outsiders are almost never admitted. Have you any references?"

The newcomer denied having any at hand.

"Well, I'll see what can be done for you," the professor at last announced dolefully, "and, in the meantime, you had better write to a number of professors under whom you have studied to ask them to send on letters of recommendation. Those might help. Of course, we have to take every precaution about whom we admit to our classes, for our standard must be kept up." At this the newcomer glanced at the young and frivolous undergraduates who were in the room, and could not keep back a smile. "This must have spurred the professor on to bring up still another difficulty," for he added, "Of course, you realize that, even should you be admitted, you would be entitled to no credit for the work you might do?"

The newcomer admitted that she knew this to be the case, expressed her thanks and made her way out. To make a long story short, after submitting testimonials as to her character and ability to study, she was

MEDICAL SOCIETY WILL MEET FRIDAY

Rev. Geo. Adam and Dean Frank Adams Will Speak.

The Medical Society will have the pleasure of hearing Rev. George Adam speak on the subject of "The Medical Man in War Time." Dean Frank Adams, of the Science Faculty, has also kindly consented to discuss "The University Undergraduate."

Many of us boys who have had the privilege of hearing Geo. Adam and of meeting Dean Adams, appreciate the pleasant evening in store. George Adam is a man's man, big-minded, strong, forceful, striking straight from the shoulder. He, at one time, held the light weight boxing championship of Scotland, and won his Blue at Edinburgh University, for football.

As for Dean Adams, why, we all know that he is a man McGill is mighty proud of, and we Medical men will be only too glad of a chance to extend our hospitality to our Science friends, and to the Arts men as well, for that matter. Come along! You're welcome, and more than welcome.

The McGill Mandolin Club will render several selections, and refreshments will be an acceptable item on the evening's programme.

Mr. Al. Greenwood promises his usual interesting case report. This may be the last meeting before the Annual Medical Dinner. So remember Friday evening.

WHAT'S ON.

TO-DAY.

1.00 p.m.—Staff photo at Gordon's Studio.
Annual Board meeting.
10 to 1 p.m.—Election of the Secretary of the Arts Undergraduate Society.

COMING.

Jan. 9.—Opening of Campus Rink.
Jan. 11.—Students' Council Meeting.

LIEUT. K. O. HUTCHISON.

Lieut. K. O. Hutchison, who has returned from France to recuperate from a wound received at Vimy Ridge, got out of hospital Friday, after being there for six weeks. He enlisted as a private in the McGill General Hospital, but later received a commission in the 73rd Battalion.

GERALD ELLIOT AND B. BEVERLY.

Word has been received that Gerald Elliot, ScL '19, and "Bill" Beverly, ScL '17, left last night for Toronto, where they will undergo preliminary training for the Royal Flying Corps.

acter and ability to study—these written in by her former teachers and by one or two influential acquaintances—she was at last admitted to that course. It was worth the trouble. The newcomer was intensely interested in her work, so much so that she actually took both the mid-year and final examinations just for her own satisfaction in proving that she could do so. Although her marks were well above the average, she got, as the professor had warned her, no sort of credit for the work she had done. Naturally, the work itself was its own reward; yet it is human to like to have something to show for what one has done.

Another winter this young woman felt a desire to desert for a time these difficult paths of learning and to go forth in search of adventure in the business world. She wished to come into closer touch with modern people and things. Too long she had sat pleasantly brooding over the Eliza-bethan period; she would go forth into the Twentieth Century. But here again there were mountainous obstacles.

Some one directed her to one of the big bureaus which find employment for college women, where an amiable lady talked with her about what she would like to do—some library, or magazine, or suffrage work, or become a private secretary for a society woman.

"What is your college," asked the amiable lady, almost forming the letters S-M-I-T-H with her fountain pen.

Then the awful confession came again, after which the amiable lady expressed her regret that she could do nothing for her.

(To be Concluded.)

CAUTION MONEY FOR THE ANNUAL.

Following on the decision of the various classes to hand over \$2.50 of each member's caution money, the Annual Board has now in circulation, under each class President, a form on which every Junior must sign his or her name. This authorizes the Bursar to hand over the money to the Board. The money, however, cannot be obtained until the end of the session; this necessitates an additional levy of 50 cents to pay immediate bills.

SCISSORED SENTIMENT.

YALE: A "Y" was voted each member of the relay swimming team which recently broke the world's record for the 200 yard relay in the meet with Columbia. As a major letter cannot be awarded member of the swimming team, special action by the athletic board of control was necessary.

PRINCETON: Princeton's varsity swimming and water polo teams easily won their opening meet of the Intercollegiate Swimming Association championship series, when they defeated the College of the City of New York 28 points to 15 at swimming, and 20 to 0 at water polo.

HARVARD: Harvard and Yale freshmen swimming teams are to meet this winter if the arrangements proposed at a meeting of the freshman candidates are agreeable to the athletic association.

SYRACUSE: Playing splendid basketball, with Schwarzer the individual star of the team, the Syracuse varsity five defeated the Yale varsity by a score of 35 to 15. The result of the game was never in doubt, the Orange offering a very strong attack, and showing much power on the defensive.

WISCONSIN: Swimmers at the University of Wisconsin are training regularly under the eye of Coach H. H. Hindman, and, provided their ranks are not depleted by the scholastic requirements which govern intercollegiate competition, the Cardinal should be well represented in the meets this winter.

QUEEN'S: Queen's have entered three teams in the O. H. A. this winter, namely, Senior, Intermediate and Junior. There are great prospects for a fast junior team here this winter, and Queen's expects to put a winning team on the ice.

DRAKE: A service flag containing 303 stars will fly from a flagpole on the campus at Drake within the next few days.

CHICAGO: President Harry Pratt Judson presented 88 degrees to graduating students at the one-hundred and fifth convocation prior to the Christmas holidays. The quarter system is used at Chicago, so that degrees are conferred four times during the year.

MICHIGAN: \$25,059 was the total sum raised by students and faculties for the Y.M.C.A. War Fund. This exceeded the amount allotted to the University.

IDAHO: The first dance of the season at Idaho State was held in the University's new barn. The revelers were dressed in gingham and "hickory" shorts, and danced to jazz music. Doughnuts and cider were served as refreshments.

NEBRASKA: An all-University men's banquet was held to honour the members of the football eleven. It is hoped to make this an annual affair to be held each year at the close of the football season.

INDIANA: The first shipment of sophomore hats has arrived, and are now seen on the campus. The hats are in the shape of helmets, similar to rosters' hats, and the colours are navy blue and orange.

GRINNELL: Of the twenty men who comprised the "first string" or Grinnell's championship grid squad this fall, not a single man was made ineligible by a condition. "Grinnell athletes are Grinnell scholars," says the Scarlet and Black, student paper. Ex-President William Howard Taft delivered an address to the students of Grinnell College. His subject was a "League to Enforce Peace." The lecture was given as the third in the college course of famous speakers this year.

PENNSYLVANIA: A war-time schedule of eight football contests has been officially adopted by the athletic council. This is a considerable decrease, the Varsity having heretofore engaged in ten or eleven battles. Michigan and Carlisle are the two more important contestants whose contracts have not been renewed, the former because of the return of the Wolverines to the western conference, necessitating fewer eastern games.

OKLAHOMA: Fayette Copeland, editor of the Oklahoma Daily and one of five students who were instrumental in starting the publication of a daily sheet at Oklahoma, has enlisted in the aviation corps and withdrawn from college.

DE PAUW: A new method of selecting De Pauw's representative in the state oratorical contest will be put into operation when the three contestants will deliver their orations before the undergraduate body and a committee of faculty men, who will then decide upon the one most worthy of presentation at the annual contest.

WISCONSIN: The University of Wisconsin Press Club, consisting of students interested in journalism, has just completed its 25th year. The club was organized on Nov. 12, 1892. Gilbert T. Hodges, manager of the New York Sun, and Prof. W. G. Bleyer, head of the course in journalism at Wisconsin, are two of the several charter members who have become well known in the journalistic world.

The Royal Military College of Canada.

THERE are few national institutions of more value and interest to the country than the Royal Military College of Canada. Notwithstanding this, its object and the work it is engaged in are not sufficiently understood by the general public.

The College is a Government Institution, designed primarily for the purpose of giving instructions in all branches of military science to Cadets and Officers of the Canadian Militia. In fact, it corresponds to Woolwich and Sandhurst.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and there is in addition a complete staff of professors for the civil subjects which form such an important part of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis the cadets receive a practical and scientific training in subjects essential to a sound modern education.

The course includes a thorough grounding in Mathematics, Civil Engineering, Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the course, and in addition, the constant practice of gymnastics, drills and outdoor exercises, all kinds, ensures health and excellent physical condition.

Diplomas in all branches of the Imperial service and Canadian Permanent Force are offered annually.

The annual competitive examination for admission to the College, takes place in May of each year, at the headquarters of the Militia Council, Ottawa, Ont., and the examination is held in three terms of 9 1/2 months each.

The total cost of the course, including board, uniform, instructional material, and all extras is about \$300.

For full particulars regarding this examination, and for any other information, application should be made to the secretary of the Militia Council, Ottawa, Ont., or to the Commandant, Royal Military College, Kingston, Ont.

PROVINCE OF QUEBEC

DEPARTMENT OF COLONIZATION, MINES AND FISHERIES. The chief minerals of the Province of Quebec are Asbestos, Chromite, Copper, Iron, Gold, Molybdenite, Phosphate, Mica, Graphite, Ornamental and Building Stone, Clays, Etc.

The Mining Law gives absolute security of Title and is very favourable to the Prospector.

MINERS' CERTIFICATES.

First of all, obtain a miner's certificate, from the Department in Quebec, or from the nearest agent. The price of this certificate is \$10.00, and it is valid until the first of January following. This certificate gives the right to prospect on public lands and on private lands, on which the mineral rights belong to the Crown.

The holder of this certificate may stake mining claims to the extent of 300 acres.

WORKING CONDITIONS.

During the first six months following the staking of the claim, work on it must be performed to the extent of at least twenty-five days of eight hours.

SIX MONTHS AFTER STAKING.

At the expiration of six months from the date of the staking, the prospector, to retain his rights, must take out a mining license.

MINING LICENSE.

The mining license may cover 40 to 200 acres in unsurveyed territory. The price of this license is Fifty Cents an acre per year, and a fee of \$10.00 on issue. It is valid for one year, and is renewable on the same terms, on producing an affidavit that during the year work has been performed to the extent of at least twenty-five days' labor on each forty acres.

MINING CONCESSION.

Notwithstanding the above, a mining concession may be acquired at any time at the rate of \$5.00 an acre for SUPERIOR METALS, and \$3.00 an acre for INFERIOR MINERALS.

The attention of prospectors is specially called to the territory in the North-Western part of the Province of Quebec, north of the height of land where important mineralized belts are known to exist.

PROVINCIAL LABORATORY.

Special arrangements have been made with the POLYTECHNIC SCHOOL of Laval University, 228 St. Denis Street, MONTREAL, for the analysis of minerals at very reduced rates for the benefit of miners and prospectors in the Province of Quebec. The well equipped laboratories of this institution and its trained chemists ensure results of undoubted integrity and reliability.

The Bureau of Mines at Quebec will give all the information desired in connection with the mines and mineral resources of the Province, on application addressed to

HONORE MERCIER,

Minister of Colonization, Mines and Fisheries, Quebec

SHORTAGE NOW AND AFTER THE WAR.

Mr. E. F. Smith, of the United States Department of Agriculture, speaking before the National Academy of Science at the University of Pennsylvania, said that following the present war there will be a shortage of wheat for many years. Every gun fired in Europe, he said, burned up a definite quantity of the comparatively rare fixed nitrogen required as the basic fertilizer for grain.—Canadian Food Bulletin.

MED. '22 MEETING.

At a meeting of Med. '22 in the Physics Building, Mr. Murphy was elected Hockey Manager. The class will begin practice immediately, and all who are turning out are requested to hand their names to the manager.

NOTICES

GLEE CLUB MEETING.

The Glee Club will hold a practice this evening in the Union at 8 p.m. The management have secured some more music for this occasion, and a thorough rehearsal is expected. After the practice, the executive will hold a meeting to discuss the programmes for some entertainments for which the Glee Club is responsible.

ARTS '18 CLASS PICTURE.

All members of Arts '18 are requested to be at Notman's studio, on Union Ave., next Wednesday, the 9th inst., at 1 p.m., in order that the class picture may be taken for the Annual. The members of the class will be able to secure groups for themselves at 75 cents each.

LECTURES CONTINUED.

The lectures on Greek Poetry for English readers, which are being delivered by Sir William Peterson and Professor Macnaughton, will be resumed in the Royal Victoria College this afternoon at 5 p.m., when the Principal will lecture on "Aeschylus and the Greek Drama."

The Executive of the Historical Club will meet at Gordon's to-day at 1 p.m., to have the group picture taken for the Annual.

A new secretary of the Arts Undergraduate Society will be elected to-day in the reading room of the Arts Building between the hours of 10 a.m. and 1 p.m. All up and vote.

TO PREVENT POTATO LOSS.

The Food Controller, with the assistance of Mr. C. A. Hayes, General Manager and other officials of the Canadian Government Railways, has completed arrangements to facilitate the marketing in Ontario and Quebec of the surplus potatoes from Prince Edward Island. This surplus is estimated to be not less than two million bushels. The potatoes will be made available in the consuming centres of Ontario and Quebec at prices which will represent fair returns to the growers, and only moderate profits to the dealers. In this way it is hoped to prevent a possible loss of any part of the potato crop, and to increase the consumption of potatoes as a substitute for wheat bread.

Members of the Fruit and Vegetable Committee of the Food Controller's Office have been working for some weeks on the details of this plan, and with the co-operation of the Fruit Branch of the Federal Department of Agriculture, and the Provincial Department of Agriculture, satisfactory arrangements have been completed for the movement of the surplus crop.

The problem of marketing the Island potatoes this year presented some peculiar difficulties. The Is-

JEST TALK
 —By Jello

SLIPPING ONE OVER.

Bill: Did you know they could make shoes out of all kinds of skins?
 Joe: How about banana skins?
 Bill: Oh! they make slippers out of them.

O DOCTOR!

To sterilize a lady's sighs
 Or kisses, is outrageous.
 We'd much prefer to humor her,
 And let her be contagious.

FOREIGN LADY IN A PHARMACY.

"I want some powder."
 "Mennen's?"
 "No, vimmen's!"
 "Scented?"
 "No, I will take it mit me."

AS USUAL.

Prof.: "What was the counter reformation?"
 Froeh: "That was the time they substituted the cafeteria for the lunch."

Ed.: "A wonderful lunch for fifty cents."
 Co-ed: "Yes, fine; let's have another."

He met her in the meadow as the sun was sinking low.
 They strolled along together in the twilight afterglow.
 Patiently she waited as he lowered all the bars,
 Her soft eyes beamed upon him as radiant as the stars;
 She neither smiled nor thanked him.
 Because she knew not how,
 For he was but a farmer's boy,
 And she—the farmer's cow.

EXCELSIOR.

First Co-ed: And when I got to class he nearly tore my hair out.
 Second ditto: Oh, and in front of the whole class, too! Weren't you embarrassed? Why didn't you tell him that there was a time and place for everything?

PERSONAL.

Will Henry return and be friends.
 Do not have any hard feelings.

OH, HANG IT!

"Poor thing! Isn't it sad? Her friend met with a violent death."
 "Oh, how did it happen?"
 "He was standing on a platform with a rope around his head. The platform gave way and he fell and broke his neck."

land people responded splendidly to the call for increased production, with the result that their exportable surplus is about five hundred thousand bushels greater than a year ago. The usual practice has been to transport potatoes by steamers and small schooners from the Island, but at the present time there is a great shortage of steamers and schooners.

The Government recently put into operation a car ferry service from Port Borden on the Island to Point Tormentine on the mainland, and advantage is to be taken of this. As a result of representations made by the Food Controller's Office to the Canadian Government Railways their officials have given instructions for the lining of Island cars, especially for the handling of potatoes. The railway will also provide stoves and fuel. The Fruit Branch of the Federal Department of Agriculture will supply men to accompany all shipments to prevent loss or damage from frost and delay so far as possible.

The facilities thus arranged for marketing the Prince Edward Island crop are of special interest and importance in view of the likelihood of lower prices for potatoes next spring. Last year, there was a rising market in the spring months, but this year, with a surplus in both Eastern and Western Canada, it is felt that unless a movement of Island potatoes is made possible during the winter months, the result in the spring would be a congested market, with very much lower prices and discouragement of the farmers to plant again.—Canadian Food Bulletin.

"LET'S WIN THE WAR."

War gardeners plan to plant potatoes during the coming year, for they form an important part of a well-balanced "war ration," that contains requisites necessary for wholesome nutrition during a period of 24 hours, says a bulletin issued by the National Emergency Food Garden Commission of Washington. This information is supplied by Professor Frederick E. Brethut, the professor of food chemistry of the College of the City of New York, who is lecturing this winter at various public schools on food values. At these lectures he is distributing the food conservation publications issued by the commission. These data will be sent to any one who will write the commission at Washington for it and enclose a two-cent stamp to pay postage.

Professor Brethut says it is possible to maintain perfect health, both of body and of mind, immunity to indigestion, kidney and liver diseases, as well as absolute immunity to gout by observing the following diet:

Graham bread 1	pound
Potatoes 2	pounds
Butter or other fat 1-3	pound
Apples 1 1/2	pounds
Milk 1	pint.

The potatoes, which are at the basis of this diet, it has been shown recently, contain protein of the highest grade, and they are available at present at comparatively low prices. Furthermore, potatoes yield an alkaline ash, which has a highly solvent power over uric acid, and therefore the results enumerated above with regard to kidney and liver diseases, gout, etc.

Professor Brethut also announced that the very latest results which have just been received from England, as reported by Professor Halliburton, show that oleomargarine made from beef fat, especially that part of it made as oleo oil, is a completely adequate substitute for butter fat. But vegetable oils, nut oils and lard are not adequate substitutes, especially when viewed from the standpoint of the chemistry of growth.

Professor Brethut gives the following eight rules for saving and safety, which embody the recommendations of Professor Graham Lusk of the Cornell Medical Institute of Pathology:

- 1—Let no family of five persons buy meat until it has bought three quarts of milk, the cheapest protein food.
- 2—Save the cream and butter and eat oleomargarine and vegetable oils. Olive oil or cottonseed oil taken with cabbage, lettuce or beet tops is excellent food, in many ways imitating milk.
- 3—Eat more sparingly, rich and poor, laborer and indolent alike. Meat does not increase the muscular power. When a person is exposed to great cold, meat may be recommended, for it warms the body more than other food. In hot weather, for the same reason, it causes increased sweating and discomfort. In general, twice as much meat is used as is right.
- 4—Eat corn bread. It saved our New England ancestors from starvation. If we eat it we send wheat to France. Eat oatmeal.
- 5—Drink no alcohol. In many families 10 per cent. of the income is spent for drink, or a sum, which, if spent for other food, would greatly improve the welfare of the family.
- 6—Eat syrup on cereals or on corn bread. It will spare the sugar. Eat raisins in rice pudding, for raisins contain sugar.
- 7—Eat fresh fish.
- 8—Eat fruit and vegetables.

"Professor Lusk is one of the most eminent scientists to-day," says Professor Brethut. "He is probably the greatest expert on nutrition in the city of New York. It is a strange fact that in our recent activities, with regard to food conservation the nutrition experts have been almost ignored. But the advice of a man of Professor Lusk's calibre is inestimable. The very first thing Germany did at the outbreak of the war was to call on Professor Rubner and other nutritional experts to address school teachers, to give them the necessary food facts, to supply the greatest knowledge need of the moment and to make the teachers the radiating centres for the diffusion of accurate, definite, concrete information.

"Our educational institutions should immediately respond to the call of their country in like manner. There is no reason why we should not immediately inaugurate emergency courses on food in war time, both for our teachers, our householders and interested men and women."

LIEUT. W. C. M. NOSWORTHY KILLED.

Word of the death of his son was received the other day by Mr. R. Nosworthy, of Kingston, Jamaica.

William Claude Michelin Nosworthy, Lieut. Royal Field Artillery, attached to the Royal Flying Corps, third son of Mr. R. Nosworthy, born at Constant Spring on 28th March, 1895, was educated at Camperdown School, Jamaica, and Exeter School, England, after which he entered McGill. When war broke out in 1914 he was in Jamaica on vacation. He was in Jamaica on vacation. He was on once returned to Canada, and severing his connection with his college he proceeded to England, where he obtained a commission in the Royal Field Artillery. He soon won his second star, and was made Adjutant of his Brigade (108th R.F.A.) Going to France he took part in the Battles of Loos and the Somme, and other minor engagements. In 1917 he returned to England and joined the Royal Flying Corps, and it was in an aerial combat over the French lines that he was mortally wounded and died on 6th December, 1917.

BATTALION ORDERS, No. 19,
by
Lieut.-Col. Robert Starke,
O.C., McGill University
Cont., C.O.T.C.

Montreal, Jan. 7, 1918.

1.—Parades.

The Battalion will parade as follows during the week ending January 12, 1918:

Tuesday, Jan. 8th: Students, 4.30 p.m. Non-students, 8.00 p.m.

Thursday, Jan. 10th: Battalion 8.00 p.m.

Saturday, Jan. 12th: Students, 3.00 p.m.

The parade on Saturday, Jan. 12th, which will be the last regular parade of the season, has been called in order to give the members of the Contingent every opportunity of fulfilling the attendance requirements.

Those members who have examinations on this day may obtain leave for the parade upon application.

2.—Musketry: No. 2 Platoon.

As announced on Saturday last, owing to difficulty in getting range accommodation, the members of No. 2 platoon are requested to parade on Tuesday evening, Jan. 8th, at 8 p.m., at the musketry ranges of the 65th Armoury, corner of Pine Avenue and Henri Julien Street.

This will take the place of the afternoon parade, and will count as two parades for those who attend.

3.—Certificate "A" Course.

The officers' course leading to Lieutenant's qualification (Certificate "A") will commence on January 29th. All students wishing to enroll for the course must hand in their names to the Adjutant on or before the 12th instant.

The amount of work entailed will be as follows:
Tuesday afternoon, 5 to 6 p.m.—Lecture.

J. C. SIMPSON, Captain,
Adjutant, McGill Cont.,
C. O. T. C.

00000000000000

WHEN IT'S THIRTY-TWO BELOW.

I sing of joys of winter,
When the mercury sinks low,
Of the pleasures of existence,
When it's thirty-two below.

'Twas on a Sunday morning,
And the world was deep in snow,
When the water pipes got frozen,
For 'twas thirty-two below.

The plumber sauntered in at two,
And worked till half-past four,
And then he dumped the furnace fire
Upon the cellar floor.

The family huddled round the grate,
My sister sat and read,
While I froze stiff beside the fire,
And wished that I was dead.

By ten we all froze hard as rocks,
The plumber banged and sawed,
At last he came and told us, that
The pipes were not quite thawed.

And then he went and left us,
"No fire to-night," he said,

LAYTON BROS.

Montreal's Leading Piano House,

550 St Catherine St. West (Corner Stanley St.)

And each of us crept shivering,
Up to an ice-cold bed.

Oh, what glorious winter weather,
When the mercury's down low!
What exhilarating atmosphere,
When it's thirty-two below!

SOME PRACTICAL RULES FOR
FOOD SAVING SUGGESTED BY
THE FOOD CONTROLLER.

As practical rules which would help towards the voluntary saving of food urged by the Food Controller, the following are suggested:
Do not eat bacon or ham unless you are engaged in extremely heavy manual work.

Do not eat meat in any form at more than one meal per day.
Do not eat both butter and jam with bread.

Do not eat candy which is made principally from cane or beet sugar. There is an abundance of other delicious confections sweetened with honey, molasses and dark syrups.

In place of a slice of bread, eat one extra potato every day.

Use less cream and more whole milk and cheese.

Eat oatmeal, barley and corn breakfast foods, and buckwheat cakes instead of wheat preparations.

Waste no milk; condensed milk is needed overseas.

The New Fall
ARROW COLLAR
20c each. 3 for 50c.

ROOM AND BOARD.

House, thoroughly renovated, furnished with all new furniture, within 3 minutes of the University. Could accommodate about 8 students. Would make special price if house was filled within a certain time. Home cooking. Phone Westmount 2625 for further information.

"The Eye, Ear and Nose" of a Suit

Doctors who specialize in their practice become expert in their particular specialty, and men and women seek them out when they are afflicted with the malady to which the doctor has devoted his study and experience.

Thirty tailors contribute to the making of each individual suit; and each tailor is a specialist, having become expert in the making of his specialty.

One man makes collars.
Another makes pockets.
A third makes linings.
A fourth fits the lining.
A fifth shapes the shoulders.
A sixth sews in sleeves—so on.
And thus the thirty specialists produce a Semi-ready Coat, and the Chief Examiner pronounces it good before there is sewn in the pocket the "Shield that Shields."

The "Yale"

Semi-ready Tailoring
